U566pt

1867

Film 8064 Item 5

I

1. The Surgeon General is stationed in the City of Washington, is charged with the administrative duties of the Medical Department, and has the complete control of all officers belonging to it. He will, with the approval of the Secretary of War, designate the stations and duties of medical officers, will issue all orders and instructions relating to their professional duties, and all communications from them requiring the action of the Secretary of War or General-in-Chief, will be made direct to him. In the absence of the Surgeon General these duties devolve upon, and will be executed by, the Assistant Surgeon General.

2. The Chief Medical Purveyor is the chief purchasing and disbursing officer of the Medical Department, and is charged, under the direction of the Surgeon General, with the selection, purchase and distribution to issuing officers of the medical supplies for the Army. He will also fill such properly approved requisitions as may be made on him.

3. Assistant Medical Purveyors are the disbursing and issuing officers of the Medical Department, and are charged with the payment of such accounts against it as may be properly approved and authorized. They shall keep on hand at their respective depots such quantities of supplies as may be deemed necessary by the Surgeon General—replacing the same by timely requisitions upon him. They shall make purchases of such articles only as are required for immediate use, or as may be specially authorized by the Surgeon General.

4. In all cases of emergency, the nature of which must be stated, Medical Purveyors shall promptly issue supplies on special requisitions made directly upon them. Except in cases of emergency they shall issue medical supplies only on the order of the Surgeon General or the Assistant Surgeon General, or the approval of a Medical Director.

5. In issuing medical supplies, Medical Purveyors shall, ordinarily, be governed by the Standard Supply Table; but when articles are required in large quantities for use in hospitals and at permanent posts, and not for reissue, or for field service, they are authorized to disregard the size of packages designated in that table, and issue in such packages as they may deem most advantageous for the public service.

6. Medical Purveyors are directed to have all surgical instruments made in the best manner, of the best materials, and according to patterns approved by the Surgeon General. Each instrument is to be inspected and each chain-saw tested on fresh bone by them, or under their supervision, before being paid for or issued.

7. Medical Purveyors shall keep the following books of records, furnished from the Surgeon General's Office, and turn them over to their successors: Record of Letters Received, of Letters Sent, of Endorsements, of Moneys Received, of Moneys Disbursed, of Taxes Retained, of Orders given for Medical Stores, of Employés.

8. When not acting as Purveyors they are assignable by the President to the duties of other medical officers.

9. When authorized by the Surgeon General, Clerks, Mechanics and Laborers may be employed at Purveying Depots, and paid by medical disbursing officers on a roll (Form 1).

10. Medical Storekeepers are charged, under the direction of the Surgeon General and Medical Purveyors, with the storing and safe-keeping of medical supplies, and with the duties of receiving, issuing, and accounting for the same, according to regulations. If a Medical Storekeeper be assigned to the depot of a Medical Purveyor, he shall prepare all requisitions under his direction and subject to his approval.

11. Medical Storekeepers shall keep the following books of records, furnished from the Surgeon General's Office, and turn them over to their successors: Record of Letters Received, of Letters Sent, of Endorsements, of Articles Received, of Requisitions, of Issues, of Invoices of Packages turned over to the Quartermaster's Department, of Contents of Packages, of Articles Expended, of Employés, of Articles and Quantities on hand.

12. Medical supplies transferred to Medical Storekeepers by Medical Purveyors will be receipted for as invoiced without breaking packages, provided that the number of packages correspond with the invoice, that they be in good shipping condition, and that there be no reason to suppose the contents broken or defective.

13. Medical Storekeepers shall cause the medical supplies issued or transferred by them to be well packed, each article designated by the name of the maker or vendor, and

each package legibly and correctly marked with the address of the officer for whom it may be intended, and with its weight and contents, whether medicines, hospital stores, instruments, dressings, books and stationery, bedding, clothing, or furniture and appliances.

14. Medical officers shall report to the Surgeon General and to the issuing officer all defects observed in the quality, quantity, or packing of medical supplies, or in the material or construction of their surgical instruments and shall state the name of the vendor or maker and that of the issuing officer.

15. Medical Purveyors shall give bonds in the sum of \$20,000—Medical Storekeepers in \$5,000. Medical officers temporarily assigned to duty as Acting Assistant Medical Purveyors are not required to give bonds.

16. All medical disbursing officers shall prepare at the end of each calendar month, and when, from change of duty or otherwise, they cease to disburse, a duly certified Monthly Account Current, in triplicate, of all public funds on hand at the date of their last returns, and received, disbursed or transferred during the month, stating the balance remaining on hand and the place of deposit (Form 2); an Abstract of Funds Received, in duplicate, (Form 3,); an Abstract of Disbursements, in duplicate, (Form 4,); and a Statement of Tax Retained, in triplicate (Form 5). The original of the Account Current; of the Abstract of Receipts, with proper vouchers, which will consist of Invoices of all moneys received by transfer (Form 8), and Accounts of all moneys received from sales (Form 15); of the Abstract of Disbursements, with proper vouchers (Forms 6 and 13,); and of the Statement of Tax Retained, shall be transmitted directly to the Surgeon General within ten days after the expiration of the month: the duplicates, with a complete set of vouchers, shall be retained. The triplicate of the Account Current and of the Statement of Tax Retained shall be sent at the same time directly to the Second Auditor of the Treasury. In case funds from distinct appropriations are received, a separate Account Current, etc., is to be prepared for each. Before the close of each fiscal quarter, Medical Purveyors shall send to the Surgeon General an Estimate of Funds needed for the ensuing Quarter (Form 7).

17. All officers in transferring funds under the control of the Medical Department shall prepare Invoices in triplicate, (Form 8,) two of which are to be given to the receiving officer and one sent immediately to the Surgeon General. The receiving officer shall prepare Receipts in triplicate, (Form 9,) two of which are to be given to the officer making the transfer and one sent immediately to the Surgeon General. The Invoices and Receipts shall show the source or appropriation from which the funds were derived.

18. The Standard of medical supplies for the Army is the Supply Table (Form 10). It is not designed to confine medical officers absolutely to that table, either in variety or quantity, but to establish a criterion for their guidance in making requisitions for supplies, leaving individual preferences to be indulged at the discretion of Medical Directors or the Surgeon General. Neither is it supposed that the quantities stated in the table will always meet the necessities caused by the prevalence of epidemics, or the location of troops in unhealthy parts of the country, and medical officers who allow their supplies to be exhausted through such contingencies, without timely notice of their prospective needs, will be held to a strict accountability.

19. Requisitions for outfits of medical supplies shall state the number of men or beds to be supplied, and whether the articles are needed for a general hospital, permanent post, or field service.

20. Requisitions to replenish medical supplies are to be made in detail, in duplicate, (Form 11,) on the 30th of June and 31st of December, and are to be transmitted by different mails. They are to be made for those articles only that actually are or are likely to be deficient, and they must exhibit the quantity of every article on hand whether more be wanted or not. In preparing them, medical officers shall conform to the Standard Supply Table, both in the respective articles and quantities asked for, but should additional articles or increased quantities be required, satisfactory reasons therefor must be assigned, or they will not be issued. At remote and inaccessible posts requisitions may be made at such times and for such periods as shall be specially authorized by the Surgeon General.

21. Acting Assistant Medical Purveyors at field depots and the senior medical officer of every hospital, regiment, post, or detached command, shall forward their requisitions for medical supplies to the Medical Director under whom they may be serving. The Medical Director will approve or modify the requisitions at his discretion and, in ordinary cases, transmit them to the nearest Purveyor for issue. If, however, in the opinion of the Medical Purveyor the articles asked for are peculiar in nature or extravagant in quantity, he shall, when the circumstances of the case permit, forward the requisition to the Surgeon General for instructions. When the quantity required is large and the interests of the service permit, the Medical Director shall transmit the requisitions, with his recommendations indorsed thereon, to the Surgeon General.

22. Special requisitions shall consist of a list of the articles and of the respective quantities required and of the quantity of each article required remaining on hand, with a certificate, properly dated and signed, that they are necessary for the public service. They are not intended to take the place of the regular semi-annual requisition and are only permissible in cases of emergency. A duplicate of every special requisition, giving the name of the officer upon whom it is made, must be immediately forwarded through the Medical Director to the Surgeon General for his information.

23. Those articles on the Standard Supply Table which are printed in italics will be furnished only on separate requisitions approved by the Surgeon General.

24. Carbolic acid, sulphate of iron, charcoal and other articles will be furnished by Medical Purveyors, when needed, as antiseptics or disinfectants, in United States Hospitals. Quicklime, chlorinated lime, and disinfectants for the use of posts, must be obtained from the Quartermaster's Department.

25. Applications for microscopes by medical officers will be favorably considered, provided the evidence be satisfactory that the officer will use the instrument for the benefit of science, and will report the results of his observations to the Surgeon General.

26. The transfer of surgical instruments issued to medical officers *for their personal use* is positively forbidden, unless authorized by the Surgeon General. Each medical officer shall retain those instruments in his immediate possession so long as he remains in the Army, and will be held responsible for their complete and serviceable condition, and for their easy accessibility at all times. If the instruments be lost, destroyed, or damaged, they must be replaced or repaired as soon as possible by means of a requisition upon the nearest Medical Purveyor, setting forth fully the causes of such loss or damage. If the loss or damage result from the unavoidable casualties of the service, the expense of replacing or repairing the instruments will be paid by the Medical Department; if from any other causes, such expenses must be paid by the medical officer.

27. Surgical instruments, medicine cases, panniers, and mess chests that need and

are worth repairing, will be invoiced and sent, when circumstances permit, to the nearest Medical Purveyor, and are not to be submitted to inspection with a view to condemnation, unless the probable expense of transportation and repair will exceed the value of the articles.

28. When it is necessary to obtain medical supplies, and recourse cannot be had to a Medical Purveyor, they may be purchased by the medical officer and Bills in duplicate therefor (Form 12,) sent through the Medical Director to the Surgeon General for examination and payment. The purchasing officer shall prepare, in triplicate, an Invoice of the articles bought (as Form 13); one copy to be forwarded to the Surgeon General with the Bills; one, as a voucher, to accompany his next Property Return, on which he shall account for the articles purchased; and one to be filed with his retained set of vouchers. Medical officers will exercise great care to avoid, by proper requisitions, the necessity for making direct purchases.

29. Medical officers shall take up and account for all medical supplies of the Army that come into their possession, and report, when possible, to whose account they are to be credited.

30. In all official lists of medical supplies, the nomenclature, order, and classification of the Standard Supply Table (Form 10,) shall be strictly followed. The whole table need not be transcribed in all instances, but the names of the articles mentioned must follow the official arrangement.

31. All officers in transferring medical supplies shall prepare Invoices in triplicate, (Form 13,) two of which are to be given to the receiving officer and one sent immediately to the Surgeon General. The receiving officer shall prepare Receipts in triplicate, (Form 14,) two of which are to be given to the issuing officer, with a report of the quality and condition of the articles, and one sent immediately to the Surgeon General accompanied by a copy of the report. A packer's list, (Form 15,) will be furnished by the issuing officer whenever requested by the officer making requisition. The contents of Medicine Wagons must be invoiced in detail. When supplies are turned over to a Quartermaster for storage or transportation, a duplicate of the Quartermaster's receipt for the packages will be forwarded to the Surgeon General with the invoice.

32. When medical supplies are sold at Public Auction the officer responsible for the property shall prepare an Account of Sales, in duplicate (Form 16). He shall also prepare an Invoice, in triplicate, (Form 13,) of the articles sold. The original of this Account of Sales, accompanied by the original of the Invoice, will be forwarded as a voucher to his money accounts (Par. 16,); the duplicate of the Account of Sales will be filed with his retained set of vouchers. The duplicate of the Invoice is to be sent to the Surgeon General, as a voucher, with his next Property Return—on which the articles sold shall be accounted for—and the triplicate filed with his retained set of vouchers.

33. Medical officers receiving money from the sale of public property shall deposit the same without delay in the nearest Government Depository, to the credit of the Treasurer of the United States, taking triplicate Certificates of Deposit therefor, the original of which shall be forwarded directly to the Surgeon General. This will serve as a voucher to the Abstract of Disbursements upon which such transfer appears. The duplicate and triplicate of the Certificate of Deposit should be retained by the officer.

34. Acting Assistant Medical Purveyors and Medical Storekeepers shall prepare at the end of each fiscal quarter, a Return, in triplicate, of medical supplies on hand at

last returns, received, expended, issued, sold and remaining on hand (Form 17). They shall also prepare a Quarterly Abstract of Receipts and Issues, in triplicate, (Form 18,) which shall state the names of the persons from whom supplies have been received; the names of those to whom they have been issued; the quantities transferred in every instance, and the dates of the transactions. The original of this Abstract, accompanied by a complete set of vouchers (Par. 35) and the original Return, shall be transmitted to the Surgeon General at the end of the Quarter, and the duplicate of the Abstract, without vouchers, and of the Return, by the next mail: the triplicate of the Abstract, with a complete set of vouchers, and of the Return, are to be retained.

35. All other medical officers in charge of medical supplies shall prepare annually, on the 31st of December, in triplicate, Returns of medical supplies on hand at last returns, received, expended, issued, sold and remaining on hand, (including personal instruments) (Form 17,) and all officers shall render similar accounts when relieved from the duty to which their returns relate. In consequence of the arrangement adopted in the Annual Property Return no separate Abstract of Receipts and Issues will, ordinarily, be required. The original of this Return, accompanied by a complete set of vouchers, which will consist of Invoices of all property received and Receipts for all property issued, shall be promptly transmitted to the Surgeon General, as shall also the duplicate, without vouchers, by the next mail. The triplicate, with a complete set of vouchers, shall be retained for the protection of the officer responsible for the property. In exceptional cases a certified Invoice may be offered by the issuing officer, in the absence of a Receipt, as a substitute for the proper voucher, together with such additional evidence as he may possess in regard to the transfer. Property rendered unserviceable by long use, lost or destroyed must be accounted for as provided in Par. 144.

36. Medical Directors will be assigned by order of the Secretary of War, and to Military Geographical Departments only; except during active operations, when they may also be assigned by the same authority to Armies. The senior medical officer of a subordinate command such as an Army Corps, Division, or Brigade of troops, or a Military District, shall be known as the Surgeon-in-Chief, and shall be charged with duties analogous to those of a Medical Director. But a Surgeon-in-Chief shall be assigned only on the recommendation of the Medical Director or the Surgeon General. The announcement of an officer as Surgeon-in-Chief does not relieve him from his ordinary post or regimental duties, unless it is so specified in the order.

37. The Medical Director is the representative of the Surgeon General and is a Staff Officer of the Commanding General, to both of whom he is responsible for the proper administration of the medical affairs of the command.

38. As the representative of the Surgeon General he receives orders directly from him, and in his own name may issue instructions concerning the medical service not in conflict with the orders of the Commanding General.

39. He shall acquaint himself by frequent inspections, either in person or otherwise, with the actual condition of the medical service, and shall issue such instructions to his subordinates and make such recommendations to his commander as will preserve and increase its efficiency.

40. Besides the reports required by Regulations, he shall make such special reports to the Surgeon General as shall at all times keep him fully informed as to the sanitary condition of his department.

41. He shall assign Acting Assistant Surgeons, Hospital Stewards not belonging to regiments, and Hospital Attendants employed under contract, to their stations and duties, and shall have control of the Ambulance Corps.

42. Whenever the limits or forces of a Department are changed, the Medical Director shall furnish, without delay, to the Director of the command to which the medical officers are transferred, a list of the same with such other information as may be of value to that officer. He shall inform the Surgeon General of all such changes on their occurrence.

43. All requisitions, claims, or official communications which require the action of the Surgeon General, should be forwarded to him through the Medical Director.

44. The Medical Director shall keep the following Records, in books furnished from the Surgeon General's Office, and such others as may be necessary to preserve a clear account of his official course, and shall turn them over to his successor: Of Letters Received, Letters Sent, Endorsements, Orders, Requisitions, Hospital Fund, Discharges, Deaths, Medical Officers, Hospital Stewards, Reports Received.

45. He shall furnish his successor with copies of all orders, circulars and reports for file received.

46. On the last day of each month the Medical Director shall make to the Surgeon General the following Returns: of Medical Officers, (Form 19,) of Private Physicians under Contract, (Form 20,) of Hospital Stewards, (Form 21,) of Ambulance Corps, (Forms 22 and 23,) when in service.

47. A board of not less than three medical officers will be appointed from time to time by the Secretary of War, to examine applicants for appointment as Assistant Surgeons, and Assistant Surgeons for promotion. And no one shall be so appointed or promoted until thus examined and found qualified.

48. The Surgeon General will designate the applicants to be examined for appointment as Assistant Surgeons. They must be between 21 and 30 years of age, and graduates of a regular medical college.

49. The board will report their respective merits in the several branches of the examination, and their relative merit from the whole; agreeably where to, if vacancies happen within two years thereafter, they will receive appointments and take rank in the medical corps.

50. When an Assistant Surgeon has served three years he is subject to be examined for promotion. If he decline the examination, or be found not qualified by moral habits or professional acquirements, he ceases to be a medical officer of the Army.

51. An applicant for appointment failing at one examination, may be allowed a second, after one year; but never a third.

52. United States General Hospitals and Hospital Transports are under the exclusive control of the Surgeon General, and will be governed by such regulations as the Secretary of War may approve upon his recommendation. They shall not be diverted from their special purposes by orders of local or department commanders or of officers of other staff Departments.

53. Commissioned medical officers, assigned to duty in charge of United States General Hospitals, or Hospital Transports, act under the instructions of the Surgeon General, and are not subject to the orders of local commanders, other than those of geographical military divisions or departments. They are charged with the duties of commanding officers and will be obeyed and respected as such.

54. At General Hospitals of five hundred or more beds an officer of the Line, or of another Department, shall be detailed to act as Quartermaster and Commissary of Subsistence, under the direction of the Surgeon in charge. At General Hospitals of one thousand beds, one such officer may be detailed as Quartermaster and one as Commissary.

55. Such guards and means of transportation shall be furnished to General Hospitals as may be recommended by the Medical Director or the Surgeon General.

56. Engineers, mechanics, and laborers for policing in General Hospitals shall be employed and paid by the Quartermaster's Department.

57. Ordinarily, attendants to General Hospitals will be allowed as follows: Three Stewards to hospitals of less than four hundred beds; one Steward to each one hundred in hospitals of four hundred or more beds; one nurse to every ten, one matron to every twenty, one cook to every thirty, and one wardmaster who shall be a non-commissioned officer, to every fifty beds. The Stewards shall be assigned by the Medical Director or the Surgeon General. The other enlisted men shall be furnished by the Commanding General on the recommendation of the Medical Director, subject to the inspection and approval of the Surgeon in charge. The civil employés shall be selected by the Surgeon in charge, subject to the approval of the Medical Director or the Surgeon General. This allowance may be changed in special cases by authority of the Surgeon General.

58. All plans for the construction of, or for repairs, additions and alterations in United States Hospitals, involving expenditure of public funds, with the exception of minor repairs, such as setting glass, etc., shall be submitted to the Surgeon General for the decision of the Secretary of War.

59. The Quartermaster's Department, when fitting up or erecting hospitals will construct the ovens. Expenses incurred in repairs to hospital bakeries will be paid from the hospital fund.

60. Medical Directors will be authorized by the Surgeon General, when necessary, to provide special hospital accommodations for sick and wounded officers.

61. On the recommendation of the Medical Director a commissioned medical officer may be detailed to act as Treasurer of the hospital or ward designated for officers, but when such detail is not made the duties of Treasurer shall be performed by the Surgeon in charge of the hospital. The Treasurer shall have the custody of the funds of the hospital, and shall collect, disburse and account for them as herein directed, and perform such additional duties as may be required by the Medical Director.

62. Officers treated in hospital shall pay for the board of themselves and their special attendants at such rates as the Secretary of War may direct. On the last day of every calendar month, and at the time of leaving the hospital, every officer shall pay the amount of his indebtedness to the Treasurer, who shall give him a receipt therefor, (Form 24). No deduction is to be made for absence for part of a day. Whenever an officer is not provided with money he shall give to the Treasurer a Certificate of Indebtedness in quadruplicate, (Form 25,) for the amount due. At the time of paying the hospital the Treasurer shall present all the Certificates in his possession to the Paymaster, who shall cash them and receive from the Treasurer Receipts in duplicate, (Form 26,) for the respective sums. If the officer be still in the hospital the Paymaster shall deduct from his pay-account the amount thus paid over and give him a receipt for the same. If the officer have left the hospital at the time of payment the Paymaster shall forward two of the quadruplicate Certificates to the Paymaster General for reference to the Paymaster

of the command to which the officer belongs, who shall deduct the amount from the officer's next pay-account, as before directed.

63. When an officer quits the hospital on leave of absence, or by discharge from the service, the amount of his indebtedness shall, for the guidance of Paymasters, be indorsed by the Treasurer on the leave of absence or discharge.

64. When an officer dies in hospital the Surgeon in charge and Treasurer shall immediately prepare a Statement of his Indebtedness, in duplicate, (Form 27,) and certify to its correctness. One copy of this Statement shall be retained by the Treasurer, and one forwarded without delay to the Second Auditor of the Treasury, through the Surgeon General, in order that the amount may be placed to the credit of the Medical and Hospital Appropriation upon the final settlement of the officer's accounts.

65. The Quartermaster's Department shall issue the fuel required for hospitals for officers, but officers in hospital shall not be entitled to commutation of fuel or quarters. The Subsistence Department shall furnish at cost price such Commissary stores as may be required by the Surgeon in charge, the bills for which shall be paid monthly by the Treasurer from the funds of the hospital.

66. The hired Cooks and Nurses employed shall be paid by the Treasurer, monthly, from the funds of the hospital, upon Rolls in duplicate, (Form 28,) certified by the Surgeon in charge, and approved by the Medical Director.

67. At the end of every calendar month the Treasurer shall prepare accounts of all receipts and expenditures, consisting of an Abstract of Receipts and Expenditures in triplicate, (Form 29)—with proper vouchers, (Forms 6—9—28—30—8)—and of two Abstracts in duplicate, marked "A" and "B", (Forms 30—31). One copy of this account, with a complete set of vouchers, shall be transmitted, within ten days after the expiration of each month, through the Medical Director for his approval, to the Surgeon General; the other, with a complete set of vouchers, shall be retained. The triplicate of the Abstract of Receipts and Expenditures is to be sent at the same time directly to the Second Auditor of the Treasury.

68. The Abstract of Receipts and Expenditures, will exhibit the amount of money and property on hand at the date of last returns, and received, disbursed, expended or transferred during the month, and the balance remaining on hand. Vouchers for all disbursements must be certified by the Surgeon in charge as regards the performance of the services or the receipt of the articles charged and paid for, their necessity and the justness of the prices. He shall also certify that the articles expended were used for the benefit of patients and their attendants in hospital entitled to receive them.

69. Abstract "A" will indicate the actual amount of funds received during the month from officers treated in the hospital and give the official designation of each, the name of his special attendant, if any, and the time charged for. When moneys are received during the same period from a Paymaster they are also to be borne upon this Abstract as in the previous case, with the addition of the name and address of the Paymaster.

70. Abstract "B" will differ from Abstract "A" simply in enumerating those officers only who shall have given Certificates of Indebtedness at the end of the month or at the time of their leaving the hospital which remain unpaid, or for whom Statements of Indebtedness shall have been prepared. The amount thus shown to be due from Certificates and Statements of Indebtedness will be stated under the head of Remarks, upon the Abstract of Receipts and Expenditures.

71. Upon the death of a commissioned officer in hospital, the Surgeon in charge, besides forwarding to the Adjutant General the required inventory of his effects, will immediately state to the nearest known relative of the officer what effects were left by him. If at the expiration of six months the articles are not called for by a person authorized to receive them, they will be sold at auction, and the proceeds, with account of sale, transmitted to the Adjutant General. Swords, watches, trinkets, etc., will not be sold but transmitted to the Adjutant General properly labelled with the name, rank, regiment, and date and place of death of the owner.

72. Officers of the Quartermaster's Department on duty at military hospitals, or in their vicinity, shall, upon the requisition of the medical officer in charge, furnish coffins and other reasonable and proper facilities for the interment of officers who die in hospitals.

73. The senior medical officer of a post is charged with the management, is and responsible for the condition, of the hospital, which is at all times subject to inspection by the commanding officer, or a duly authorized inspector.

74. Ordinarily, the allowance of attendants to post hospitals shall be as follows: to a post or garrison of one company, one steward, who shall also be ward-master, one nurse, one cook, and one matron; for every additional company, one nurse; and besides, where the command exceeds five companies, one ward-master who shall be a corporal and one matron; at arsenals where the number of enlisted men is not less than fourteen, one matron is allowed. The allowance of hospital attendants for troops in the field will be, for one company, one steward, one nurse, and one cook; for each additional company, one nurse; and for commands of over five companies, one additional cook.

75. The senior medical officer shall select from the command suitable cooks and nurses, and, at posts where there is no hospital steward, a soldier to act as steward, with the approval of the commanding officer; he will also appoint the matrons. Whenever practicable, cooks and nurses shall be taken from the privates, and shall be exempt from other duty, but shall attend the parades for muster and weekly inspection of their companies at the posts, unless specially excused by the commanding officer.

76. Upon the authority of the Surgeon General, cooks and nurses may be hired upon contract (Form 32,) and employed in any United States Hospital when it shall appear that suitable enlisted men cannot be procured. They shall receive one ration a day and such compensation as may be authorized by the Secretary of War. They shall be paid by paymasters on rolls certified by the Surgeon in charge. When travelling on duty, under proper orders, they may have their rations commuted at the rate allowed to soldiers travelling on detached service.

77. The senior medical officer shall make up the muster and pay rolls of the hospital stewards, nurses, and matrons, and of all soldiers in hospital, sick or on duty, detached from their companies, on the forms furnished from the Adjutant General's office, and according to the directions expressed on them. He shall also make up the rolls of the cooks and nurses for extra-duty pay (Form 33).

78. The senior medical officer of each hospital, post, regiment or detachment, shall keep the following records, and deliver them to his successor: a Register of Patients (Form 34,); a Register of Surgical Operations (Form 35,); a Register of Patients' Effects (Form 36); a Register of Deaths and Interments (Form 37,); a Case, Diet and Prescription Book (Form 38,); Medical History of the Post; copies of his Requisitions, Annual Returns, and all other Reports; Record-books of all Orders and Letters relating to his duties.

79. The senior medical officer of each hospital, post, regiment or detachment, shall prepare and forward the following reports:

1. A Daily Report of Sick and Wounded, (Form 39,) for the commanding officer.

2. A Weekly Report of Sick and Wounded, (Form 40,) to be made out in duplicate on the last day of each week. One copy is to be sent to the Medical Director, the other directly to the Surgeon General.

3. A Monthly Report of Sick and Wounded, (Forms 41-42,) to be made out in duplicate on the last day of each month, and forwarded as directed for the weekly report.

4. A Monthly Report of Hired Nurses and Cooks, (Form 43,) to be made out in duplicate on the last day of each month, one copy to be sent to the Medical Director and one to the Surgeon General.

5. A Monthly Statement of the Hospital Fund, (Form 44,) to the Surgeon General through the Medical Director. An Invoice of all Durable Articles purchased during each month from the Hospital Fund is to be prepared in triplicate and certified by the medical officer in charge of the Hospital. The original of this Invoice will be forwarded to the Surgeon General with the copy of the Statement of the Hospital Fund for the month, and the duplicate and triplicate used as directed in clause 8.

6. Quarterly Reports of Wounded, (Form 45,) of Surgical Operations, (Form 46,) and of Wounded remaining under treatment at the beginning of the Quarter, (Form 47). These reports are to be made out on March 31, June 30, September 30 and December 31, of each year, and forwarded to the Surgeon General.

7. A Semi-Annual Sanitary Report, (Form 48,) in duplicate, on 30th June and 31st December. These reports shall be sent to the Medical Director, by whom one shall be forwarded, with his remarks, to the Surgeon General.

8. A Return of Durable Property purchased from the Hospital Fund, (Form 49,) to be made out in duplicate on 31st December, or whenever relieved from the charge of it, and forwarded to the Surgeon General, with one set of the invoices mentioned in clause 5. The triplicate invoices will be kept with the officer's retained copy of his return.

80. When a post is abandoned, or a detachment is broken up, the medical officer shall report it, without delay, to the Medical Director and the Surgeon General, and shall make the required reports of sick and wounded without waiting for the termination of the periods specified in other cases.

81. The diet of patients in United States Hospitals will be regulated, as far as practicable, according to such tables as may be issued by the Surgeon General.

82. At all Post Hospitals such number of hospital tents shall be kept on hand as will accommodate an equal number of beds to those contained in the hospital. They shall be under the control of the medical officer and are to be used in emergencies only.

83. Medical and official publications furnished from the Surgeon General's Office to Surgeons in charge of Post and other hospitals, belong to the hospital library and are to be properly filed and preserved therein.

84. The field hospital service in time of war, shall be conducted under the orders of the Medical Directors, in conformity with such instructions as shall be issued from time to time by the Surgeon General.

85. The Secretary of War will appoint from the enlisted men of the Army, or cause to be enlisted, on the recommendation of the Surgeon General, one Hospital Steward for

each military post, and as many more as the service may require. Regimental Hospital Stewards being allowed by law, they may be appointed in the same manner as other Hospital Stewards, on the recommendation of the Surgeon General.

86. Hospital Stewards shall be under the immediate command of the senior medical officer of the post or detachment. Hospital Stewards on duty at posts shall not be detached, except on the order of the Surgeon General, the Medical Director or the Department Commander.

87. All Hospital Stewards shall, at the end of every month, report by letter through their medical officers to the Adjutant General and the Surgeon General and to the Medical Director of the military department in which they may be serving; giving their station, and the number, date, and source of the order directing any new assignment. They shall likewise report monthly to the Adjutant General, and the Surgeon General and the Medical Director when on furlough.

88. When a Hospital Steward is discharged by expiration of service or other cause, a special report of the fact will be made to the Surgeon General by the medical officer in charge, who will also state the character, efficiency and capacity of the Steward as far as his knowledge extends.

89. The senior medical officer of a hospital, post or command, requiring a Steward, shall apply for the same to the Medical Director, who will forward the application to the Surgeon General if unable to fill the vacancy from those Stewards serving in the Department. If the hospital, post or command is not within the limits of a Military Geographical Department, the application will be forwarded direct to the Surgeon General. If any competent non-commissioned officer or soldier be present he may be recommended for appointment, by the medical officer, which recommendation shall be transmitted to the Medical Director by the commanding officer, with his remarks thereon, and also with the remarks of the company commander, and the Medical Director will forward the same to the Surgeon General. No soldier or citizen should be recommended for appointment who is not *known* to be temperate, honest, intelligent, and acquainted with pharmacy.

90. When necessary, and on the recommendation of the medical officer, the commanding officer shall detail a soldier to act as Steward. A soldier so detailed and serving with a command of more than four companies will be mustered as a Hospital Steward of the second class and receive the pay of \$25 per month. When serving with a command of four or a less number of companies he will be mustered as a Hospital Steward of the third class, and receive the pay of \$23 per month. When no competent enlisted man can be obtained the medical officer shall report the fact to the Medical Director. Applications and testimonials of persons desirous of enlisting as Hospital Stewards may be addressed to the Surgeon General.

91. The commanding officer shall re-enlist a Hospital Steward at the expiration of his term of service, on the recommendation of the medical officer.

92. The accounts of pay, clothing, etc., of Hospital Stewards must be kept by the medical officers under whose immediate direction they are serving, who shall be responsible for certified statements of such accounts, and correct descriptive lists of such Stewards, to accompany them in case of transfer—and for the accuracy of their final statements and certificates of discharge, when they are discharged from service.

93. When it is necessary to employ a private physician in the military service, the Surgeon General, the Medical Director, or, in emergencies, the commanding officer of a

detachment, may do so by a written contract, (Form 50,) at a stated compensation, not to exceed \$80 per month when the number of persons to be attended is one hundred or more, \$60 when it is from fifty to one hundred, and \$40 when it is under fifty.

94. But when he is required to abandon his own business and give his whole time to the public service, the compensation may be fixed at \$100 per month, and \$125 per month when on duty west of the hundredth degree of longitude or at a small-pox hospital, or on quarantine duty, or with troops on marches or on transports. He shall also receive the fuel and quarters of an Assistant Surgeon and transportation, to be furnished in kind. Where he is traveling under orders and transportation cannot be furnished in kind, the actual cost of his transportation and the transportation of his baggage shall be paid by the Quartermaster's department.

95. And when a private physician is required to furnish medicines, he shall be allowed, as compensation, 25 to 50 per cent. on the sum paid for his services, as may be determined by the Surgeon General.

96. Leaves of absence, not to exceed thirty days in one fiscal year except when given for wounds received in the discharge of duty, may be granted by Medical Directors to private physicians under contract.

97. In all cases, a duplicate of the contract shall be transmitted forthwith to the Surgeon General, through the Medical Director, and the Medical Director shall at once discontinue the contract whenever the necessity for it shall cease.

98. The accounts of contract physicians will be paid by paymasters, and are to be made out in the ordinary form of an officer's pay account, vouched for by a certificate thereon by the commanding officer that it is correct and according to contract, which certificate he will not make unless the contract has been approved by the Medical Director of the Department or by the Surgeon General. The payments shall be made under the same rules that govern in the payment of officers at the same station.

99. At surgeon's call the sick then in the companies will be conducted to the hospital by the first sergeants, who will each hand to the surgeon, in his company book, a list of all the sick of the company, on which the surgeon shall state who are to remain or go into hospital; who are to return to quarters as sick or convalescent; what duties the convalescents in quarters are capable of; what cases are feigned; and any other information in regard to the sick of the company he may have to communicate to the company commander.

100. Patients in hospital are, if possible, to leave their arms and accoutrements with their companies, and in no case to take ammunition into the hospital.

101. Soldiers in hospital, and attendants, shall be mustered on the rolls of their proper commands, if they are present at the post.

102. When a soldier in hospital is detached from his company so as not to be mustered with it for pay, his company commander shall certify and promptly send to the hospital his descriptive list, and account of pay and clothing, containing all necessary information relating to his accounts with the United States, on which the surgeon shall enter all payments, stoppages, and issues of clothing to him in hospital. When he leaves the hospital, the medical officer shall certify and remit his descriptive list, showing the state of his accounts. If he is discharged from the service in hospital, the surgeon shall make out his final statements for pay and clothing, and shall in all cases promptly notify the Adjutant General and the company commander of the date, place and cause of such discharge. If

he die in hospital, the surgeon shall take charge of his effects, and make the reports required in the general regulations concerning soldiers who die absent from their companies.

103. Sick and wounded soldiers discharged while in hospital by the expiration of term of service will be entitled to medical treatment in hospital and to the usual ration during their disability or for the period considered proper for them to remain under treatment. But a discharged soldier who has left the hospital shall not be readmitted except upon the written order of the commanding officer or the Medical Director.

104. Whenever a patient is transferred from the care of one medical officer to another, the account of his case, taken from the records, (Form 38,) shall accompany him.

105. In all cases of death from disease or accident the history of the case shall be accompanied by the record of the autopsy, which shall always be made unless specially objected to by the relatives of the deceased, or impracticable for reasons which must be stated.

106. All pathological specimens of interest, accompanied, if possible, by complete histories of the cases, shall be forwarded to the Army Medical Museum.

107. Hospital clothing belongs to the United States, and shall be worn by patients during their stay in the hospital only. Each article will be marked as hospital property. But where very sick soldiers are transferred from one hospital to another the hospital clothing necessary for their comfort may be sent with them, properly invoiced, and accompanied by a check list giving the names of the men in whose possession it is.

108. When a soldier is discharged from treatment for small-pox his infected clothing and equipments shall be burned and the regulation allowance be replaced gratuitously, article for article, by the proper Departments.

109. Tents, clothing, hospital furniture and any other stores that have been used in the treatment of contagious diseases shall in no instance be turned into depots, but shall be either burned or thoroughly disinfected and stored by themselves for further use, as may be recommended by the Medical Director.

110. An important part of the duty of a medical officer is the supervision of the hygiene of the post or command to which he is attached, and the recommendation of such measures as he may deem necessary to prevent or diminish disease among the troops.

111. For this purpose he shall at least once a month examine, and note in the Medical History of the Post, the condition of quarters, including all buildings belonging to the post, the character and cooking of the rations, the amount and quality of the water supply, the drainage, and the condition, clothing and habits of the men, and shall make in writing to the commanding officer such recommendations as he may deem proper.

112. If the action recommended be deemed impracticable or undesirable the commanding officer shall state his objections in writing to the medical officer, who shall note them upon the Medical History of the Post and forward them with a copy of his recommendation to the Medical Director.

113. Whenever soldiers are to be transported by water and it is probable that the duration of the voyage will exceed twenty-four hours, the vessel and troops shall be carefully inspected by a medical officer before the men embark. The Inspection Report (Form 51,) shall be made in triplicate: one copy to be given to the senior medical officer accompanying the troops, one to be forwarded to the Surgeon General through the Medical Director, and the third to be filed in the office of the Medical Director. Should the inspecting officer consider the vessel not in proper sanitary condition or unsuitable for the purpose, he

shall so report in writing, with his reasons in detail, to the officer having authority over the movement, and shall forward a copy of the same with his Inspection Report to the Medical Director. If the commanding officer object to make the changes recommended he shall notify the inspecting officer in writing, who shall forward the communication to the Medical Director, retaining a copy for his own protection. But no vessel shall start on a voyage of more than forty-eight hours against the advice of the inspecting officer, unless grave military reasons exist for so doing.

114. Immediately upon the termination of the voyage, the medical officer in charge of the troops shall fill out the required headings on his copy of the report and transmit it to the Surgeon General through the Medical Director. If in the opinion of the Medical Director any further investigation may be necessary, the Commanding General shall convene a Court of Inquiry, of which at least one member shall be a medical officer, to examine the matter and express an opinion thereon.

115. Medical officers, where on duty, shall attend officers and enlisted men, and the servants and laundresses authorized by law; and at stations where other medical attendance cannot be procured, and on marches, the hired men of the army, and the families of officers and soldiers. Medicines will be dispensed to the families of officers and soldiers, and to all persons entitled to medical attendance; hospital stores to enlisted men, and to officers at posts where they cannot be obtained by purchase.

116. When medical attendance is required by officers or enlisted men on duty or for the authorized servants of such officers, and the attendance of a medical officer cannot be had, the officer, or, if there be no officer, then the enlisted man, may employ a private physician, and a just account therefor will be paid by the Medical Department.

117. The account shall state the name of the patient, and the date of and charge for each visit and for medicines (Form 52). The physician shall make a certificate to the account in case of an officer, or an affidavit in the case of an enlisted man, that the account is correct, and the charges are the customary charges of the place.

118. The officer shall make his certificate, or the enlisted man his affidavit, to the correctness of the account, that he was on service at the place, and stating the circumstances preventing him from receiving the services of a medical officer.

119. When the charge is against an officer, he should pay the account if practicable, and transmit it, properly receipted, to the Surgeon General for reimbursement; in all other cases the account shall be transmitted to the Surgeon General for settlement.

120. If the charge is against a deceased officer or enlisted man, the physician shall make the affidavit, before required, to the account, and that he has been paid no part of it.

121. No charges for consultation fees will be paid by the Medical Department; nor will any account for medical attendance or medicines be paid, if the officer or enlisted man be not on duty.

122. Accounts for the board, nursing and medical attendance of sick soldiers in private hospitals (Form 6,) shall be sent to the Surgeon General for settlement.

123. Medicines and hospital stores may be dispensed to civilians at posts where they cannot be obtained by purchase, gratuitously to those who are unable to pay, and at a fair valuation in other cases. The funds derived from such sales shall be disposed of as directed in Par. 38.

124. The examination of recruits shall be conducted in the presence of the recruiting officer, and according to the principles of Tripler's, Bartholow's, or such other manuals as may be approved by the Surgeon General.

125. Medical officers shall keep a record (Form 53,) of all recruits examined by them. Books for this purpose will be furnished to all recruiting stations by the Surgeon General, to whom they shall be returned when filled. A Monthly Report (which shall be an exact copy of the record) of all recruits examined shall be made to the Surgeon General.

126. Every recruit shall be examined by the medical officer and vaccinated, if necessary, as soon as he joins the rendezvous or regiment.

127. At such posts as may be designated by the Surgeon General, a meteorological register shall be kept by the senior medical officer.

128. Every medical officer conducting meteorological observations under this regulation, shall make monthly, to the Surgeon General, a report, (Form 54,) which shall be a true copy of the register.

129. Instruments for the observations, books for recording them, and blanks for the monthly reports will be issued from the Surgeon General's Office.

130. No part of the observations indicated in Form 54 will be dispensed with, nor additional ones recorded, except in accordance with special instructions from the Surgeon General.

131. The following amount and kind of transportation for the sick and wounded, shall be provided for troops in time of peace: at permanent posts, one two-horse ambulance; on marches and in temporary camps, for two companies or less, one two-horse ambulance; for every two additional companies, one two-horse ambulance. In time of war or in active campaigns the transportation shall be provided as directed by Act of Congress, approved 11th March, 1864.

132. Ambulances shall not be used for any other than the specific purpose for which they are designed, viz: the transportation of the sick and wounded; and they will be under the exclusive control of the senior medical officer present for duty.

133. On requisitions approved by the Medical Director, the Quartermaster's Department will furnish the horses, harness, forage, forges, and ambulances, the latter to be made according to patterns furnished by the Surgeon General.

134. The following will be the field allowance of tents for the sick, their attendants and hospital supplies:

For less than three companies,.....	{ One (1) hospital tent, One (1) Sibley tent or its equivalent, One (1) common tent.
For three and less than seven companies,	{ Two (2) hospital tents, One (1) Sibley tent or its equivalent, One (1) common tent.
For seven and less than ten companies,...	{ Three (3) hospital tents, One (1) Sibley tent or its equivalent, One (1) common tent.
For ten companies,.....	{ Four (4) hospital tents, One (1) Sibley tent or its equivalent, Two (2) common tents.

135. The hospital and ambulance flags of the Army shall be as follows; for General Hospitals, yellow bunting, 9 by 5 feet, with the letter H, 24 inches long, of green bunting, in the centre; for post and field hospitals, yellow bunting, 6 by 4 feet, with letter H, 24 inches long, of green bunting, in the centre; for ambulances, and guidons to mark the way to field hospitals, yellow bunting, 14 by 28 inches, with a border, one inch deep, of green.

136. The Quartermaster's Department shall furnish transportation for the instruments,

professional books and medicine chests of medical officers, and for specimens sent to the Army Medical Museum.

137. Upon the march or in battle, medical officers shall habitually be attended by a mounted orderly carrying a medicine case and such instruments as may be considered necessary.

138. Within two days after every action, the senior medical officer on duty with a regiment or detachment, shall transmit through the proper channels to the Medical Director in duplicate, lists of wounded (Form 55,) and classified return of wounds and injuries (Form 56,) of the command to which he is attached. The Medical Director shall immediately forward one set of these lists to the Surgeon General, and retain the other to accompany his report to his commanding general.

139. In every case, the death of a medical officer, contract physician or Hospital Steward shall be specially reported by the attending surgeon or the nearest medical officer, to the Medical Director and the Surgeon General.

140. Application for permission to transfer sick men from one military department to another is to be made to the Surgeon General by the Medical Director.

141. All blank forms that are required by medical officers shall be obtained directly from the Surgeon General. Ordinarily, requests shall be for a six months' supply. With armies in the field they shall be obtained from the Medical Director.

142. All empty boxes, cans and bottles in which medical supplies were received, at permanent posts, not required for further use in Hospital, shall be disposed of at private or public sale at least once a year, by the medical officer in charge, who will turn over the net proceeds of such sales without delay to the nearest United States Assistant Treasurer or Special Government Depository, as directed by Par. 33. He will at the same time prepare and forward the Account of Sales as directed by Par. 32.

143. Empty boxes, cans and bottles in the field are expendable when not required for further use.

144. Medical property will be condemned only upon the recommendation of a Medical Inspector, or of a medical officer specially detailed for that purpose by the Department Commander, and upon forms similar to those for the condemnation of other military property.

145. Whenever it is deemed advisable, the Surgeon General may authorize contracts to be made for washing for General Hospitals and Hospital Transports.

146. Surgeons from civil life who tender their services for the benefit of the sick and wounded in the field, under the invitation of the Secretary of War, will each be allowed transportation to and from the place their services may be needed and, while so employed, the use of a public horse, a tent, servant, and the privilege of purchasing subsistence stores from the commissary department.

We, the subscribers, do hereby acknowledge to have received of Medical Purveyor, U. S. A., at the sums set opposite our names, respectively, being in full of our pay for the period herein expressed, having signed duplicates hereof.

.....
Medical Storekeeper, U. S. Army.

(FORM 19.)

Return of Medical Officers serving in the Department of, for the month of, 186...

NUMBER.	NAMES.	RANK.		GRADE.	DATE OF COMMISSION OR MUSTER.	STATION.	WITH WHAT TROOPS OR ON WHAT DUTY.	REMARKS.
		Real.	Brevet.					
								(INDORSEMENT.) FORM 19. Return of Medical Officers in the Department of for the month of, 186Surgeon, U. S. A., Medical Director.

.....
.....Surgeon, U. S.
Medical Director.

NOTE.—The names will be arranged according to rank and in the following order: 1. Regular Army; 2. Volunteer Staff; 3. Volunteer Regimental, in the alphabetical order of States, the arm of service and the numerical order of regiments; 4. Militia (in the same order as Volunteers). Where an officer has been mustered into the United States service, the date from which he has been mustered, and not that of his commission, should be given. Under "Remarks" note all changes of grade, station or duty, whether on leave of absence or otherwise, since last report, giving the number, date and source of the order authorizing the change, the time of departure from and return to stations, and mention any engagements or epidemics in which present. If a new post is mentioned, its position must be indicated by reference to some known point as miles north of Officers of each class are to be borne on separate folios. All officers in service at the date of one Return must be accounted for on the next, those lost being borne on the last folio.

Surgeon General's Office,, 1867.

(FORM 20.)

Return of Private Physicians under contract serving in the Department of for the month of, 186...

NUMBER.	NAMES.	DATE OF CONTRACT.	WITH WHOM MADE.	COMPENSA-TION.	STATION.	WITH WHAT TROOPS OR ON WHAT DUTY.	REMARKS.
							(INDORSEMENT.) FORM 20. Return of Contract Phy- sicians serving in the De- partment of during the.....ending, 186 . Reported bySurgeon, U. S. A., Medical Director.

.....
.....Surgeon, U. S.
Medical Director.

NOTE.—Enter the names alphabetically. Under remarks note all changes, whether of station, duty or compensation, and all absence, with dates and authority in each case. Also any engagement or epidemic in which the physician may have been present. All physicians reported on one Return must be accounted for in the next, and where a contract has been terminated it must be reported by whom and for what cause.

(FORM 21.)

Return of Hospital Stewards serving in the Department of , for the month of , 186...

NUMBER.		NAMES.	Grade.	DATE OF ENLISTMENT.	DATE OF WARRANT OR DETAIL SERVICE.	STATION.	WITH WHAT TROOPS.	REMARKS.
Grade.	Total.							
<div>(INDORSEMENT.)</div> <div>FORM 21.</div> <div>Return of Hospital Stewards in the Department of for the month of , 186 .</div> <div>.....</div> <div>..... Surgeon, U. S. A., Medical Director.</div>								

..... Surgeon, U. S.
..... Medical Director.

NOTE.—Enter the names alphabetically in the following order: 1st, Regular Army Staff; 2d, Regular Regimental; 3d, Regular Stewards of 2d and 3d classes; 4th, Volunteers; 5th, Militia. Under "Remarks," note all changes of grade or station and all absences, with the number, date and source of the authority. Mention any epidemic or engagement in which present or any peculiar service rendered. All Stewards reported on one Return must be accounted for on the next; and all gain and loss during the month will be recapitulated and noted in the following order: joined, transferred, discharged, died, deserted. The number, date, &c., of orders, and the source from whence derived, will always be carefully specified.

Surgeon General's Office, , 1867.

CASE, DIET, AND PRESCRIPTION BOOK.

NOTE.—The covers of this book are separate, and so arranged that the book may be doubled back and held in the left hand while being used. Each leaf is a separate sheet, which may be removed without disturbing the others. Additional leaves may be inserted as required. Each sheet will contain the history of not more than one patient. When a case is terminated its history shall be transmitted to the Surgeon General with the next Monthly Report of Sick and Wounded.

NOTE.—None will be carried on the report who are absent from the post. Men for partial duty will be reported by name, and the duty to which liable explicitly stated. Deaths and the causes will be entered, whether of men previously reported sick or not, and they will be reported by name under remarks. Officers off duty from sickness or wounds will be reported by name.

..... Surgeon, U. S. Army.

DISCHARGES ON SURGEON'S CERTIFICATE, AND DEATHS FOR THE MONTH OF, 18..

NOTE.—Discharges on Surgeon's Certificate, and Deaths occurring among those not on Sick Report, will also be reported, but separated from the others by a double line drawn across the page. The Remarks will in each case specify the manner in which the disease originated, when it is known. In every case of the death of an officer, whether on duty or not, a special report is to be made to the Surgeon General.

[illegible]

(Form 41—Continued)

REMARKS.

DIRECTIONS.—Here make any necessary explanations and communicate any matters of interest with regard to prevailing diseases, or the sanitary condition of the troops. Interesting cases and autopsies should be communicated in full, either in this place, or in an accompanying letter. In case a hospital is opened or closed, during the month, it should be stated by whose order and on what day.

I certify that the above Report is correct and true to the best of my knowledge and belief.

(To be signed by the Medical Officer in Charge, with name and rank in full).

..... Surgeon,

(INDORSEMENT.)

Form 41.

MONTHLY REPORT
OF

SICK AND WOUNDED.

Station.....18..

Forwarded by

.....Surgeon.....
(Here give legibly the name and rank.)

COMMAND.

Here specify legibly the name of the Regiment and the letters of the Companies, Battalion, and Brigade, Division, and Army, or Department, in which it is serving.

DIRECTIONS.

I. In filling the first page of this Report, enter in the tabular list the names of those diseases only of which there are cases to be reported as "remaining from last month," or "taken sick and wounded during the month." The nomenclature and nosology must be given in full, and the date of the onset of the disease, and the date when the disease occurred, which are to be provided for by it. In such cases the Surgeon must state under the head of "remarks," his reasons for departing from the Form. Enter opposite the name of each disease, the number of cases remaining, taken sick, &c., using ordinary numerals.

II. Patients sent on furlough while under treatment, will be considered as still "remaining under treatment," and when they return will not be reported as new cases. Should a patient die or desert while on furlough, the fact will be reported in the column of "died," or "deserted."

III. No arrangement is made on this blank for reporting secondary diseases or complications. Should these be in any case interesting the facts are to be stated on the third page, under the head of "remarks." IV. When a soldier reported during one month as "taken sick," or "taken sick and wounded," and again reported during the next month as "taken sick," or "taken sick and wounded," the death will be entered in the proper column, opposite the name of the disease which was the cause of death, but no new case will be entered to correspond. In all such instances the facts are to be set forth in the "remarks," and the necessary statistical corrections will be made in the Surgeon General's Office.

V. Separate reports will in all cases be made for white and colored troops; in the case of colored troops the first page of this report will present only the diseases of colored men. The name and rank of sick white and colored troops, as well as the date of their admission to the hospital, will be placed on the third page of the report of colored troops, under the head of "remarks."

VI. The "mean strength of the command" is to be ascertained as follows: The total strength present on the 10th, 20th, and last day of the month, as obtained from the commanding officer, are to be added together and divided by three. This is to be done for officers and enlisted men separately; the nearest whole numbers are to be used and not decimals or fractions. No mean strength is to be reported in the case of General Hospitals, or in the case of commands where the strength is not permanent. The mean strength of the command, and the number of cases which, of course, make monthly sick reports. In all other cases when sick are received from commands belonging neither permanently nor temporarily to the post, the facts will be noted under the "remarks."

(FORM 42.)

Nomenclature to be followed in making the Monthly Report of Sick and Wounded. (See Form 41, Direction 1.). This nomenclature will be strictly observed, except when diseases occur which are not provided for by it. In such cases the Surgeon must state, under the head of "Remarks," his reason for departing from the Form.

CLASS I. ZYMOTIC DISEASES.

ORDER 1. MIASMATIC DISEASES.

Typhoid fever.
Typhus fever.
Typho-Malarial fever.
Yellow fever.
Remittent fever.
Quotidian Intermittent fever.
Tertian Intermittent fever.
Quartan Intermittent fever.
Congestive Intermittent fever.

DIRECTIONS.

- (a) Note present strength, composition and changes since last report, and all transient troops and their destination.
- (b) Erection, demolition and essential changes to be noted.
- (c) Natural and artificial illumination.
- (d) Police within and without.
- (e) Note where and how refuse is transported and its ultimate disposition.
- (f) Character of manual and fatigue duties.
- (g) Name, conduct and efficiency of each.
- (h) Names, length of time, and payment for subsistence.
- (i) On admission and in hospital.
- (j) Mention actions in which command has engaged.
- (l) State whether estimated or observed.
- (m) Specify how many ambulances, horses, stretchers, &c. of each kind, and their condition.
- (n) Abstracts of reports made.
- (o) Note character [e. g., tribe of Indians], physical condition, etc.

Medical Officers in making this report will be governed by the Regulations for the Army, and by existing orders and circulars. The headings on this form are necessarily brief, and an intimate knowledge of or immediate reference to Regulations and Orders is necessary to give the desired information. When more space is required, reference must be made to notes *by Roman numerals*, or to special reports *by capital letters*.

When alterations, improvements, or repairs requiring the action of Heads of Bureaux, are considered essential, special reports, accompanied by plans and approximate estimates of quantities and cost, will be made.

Note all alterations made in post since last report, and state if made in consequence of medical advice.

Register of Examination of Recruits at for the month of 186..., by Surgeon U. S. Army.

[illegible]

Note.—This Register should be a complete and accurate Record of each man examined as a recruit, the entries being made at the time of examination. In filling up the columns "Height," and "Measurement of Chest on level of Nipples," state inches and quarter inches. The measurement of the chest should be taken with the arms dropped by the sides. Under the head of "White or Black and Complexion," write W for white and B for black, followed by the words dark, light, negro, mulatto, etc., as the case may be. The column for record of weight need only be filled at those depots to which special instructions on the subject have been issued by the Surgeon General. When a recruit is rejected, the cause of his rejection should be fully stated in the column of Remarks. In the same column should be noted whether the man has previously been a soldier.

and a soldier.
The Monthly Report of Recruits examined, sent to the Surgeon General, will be an exact copy of this Register.

Date of transmission

..... Surgeon, U. S.

(FORM 57.)

FORM OF A MEDICAL CERTIFICATE.

....., of the regiment of, having applied for a certificate on which to ground an application for leave of absence, I do hereby certify that I have carefully examined this officer, and find that [*Here the nature of the disease, wound, or disability is to be fully stated, and the period during which the officer has suffered under its effects.*] and that, in consequence thereof, he is, in my opinion, unfit for duty. I further declare my belief that he will not be able to resume his duties in a less period than [*Here state candidly and explicitly the opinion as to the period which will probably elapse before the officer will be able to resume his duties. When there is no reason to expect a recovery, or when the prospect of recovery is distant and uncertain, it must be so stated.*]

Dated at, this day of

Signature of the Medical Officer.....
